

KHAYAH

Tector

WELCOME TO TECTOR

Tector is a promise of quality, built on the latest construction expertise and formulas. There are several brands under Tector, each with its own promise to you, our proud Khayah customer.

- **TectorCeram Ceramic Tile Adhesive (C1)**
- **TectorCeram Porcelain Tile Adhesive (C2)**

With TectorCeram, forget about loose tiles that crack easily and leave unsightly gaps on your beautiful floors. TectorCeram is the highest class of wall and floor tile adhesive available on the market, and presents superior strength to exacting global standards. TectorCeram has the highest bonding and adhesion strength compared to competing products in the market. It is perfect for ordinary homes and institutions and avoids costly reworks from tiles coming off loose and cracking.

Made with a special blend of quality guaranteed ingredients, TectorCeram is a class C2 adhesive, presenting the highest level of quality in tile adhesives.

C1 Features and Benefits

- Excellent handling
- Good adhesion strength
- Good workability

C2 Features and Benefits

- Improved tile adhesive
- Excellent handling
- Excellent adhesion strength
- Excellent workability

TectorPlast SkimCoat

Available in grey and white colours, and in 20kg and 40kg packs, TectorPlast SkimCoat provides superior finishing for walls, giving both strength and beauty, and leaving a smooth, consistent buttery finish to walls with the strength of a quality guaranteed Khayah product. TectorPlast SkimCoat uses Lafarge cement bases, blended with special additives that enhance workability, texture and ease of application. At an amazing price compared to gypsum based skimcoats, TectorPlast SkimCoat is the smart choice for a durable and quality wall finish at great value. Just add water and start skimming your home with beautiful TectorPlast.

Features and Benefits

- High polymer content provides a stronger bond to substrate eliminating chipping and roughening of concrete surfaces
- Infusion of advanced chemical additives provide high initial adhesiveness and non-sag properties making it ideal for overhead applications
- Extended open time provides greater workability for a superior finish
- Easy to use, mix with water only
- Smooth and creamy consistency for easy application
- Easy mixing and plastering, reduces finishing time and lowers labor cost

TectorPlast Plastering Mortar

TectorPlast Plastering Mortar is a superior plastering product for dressing brick work with a high quality, durable cement based plaster – ahead of painting or applying TectorPlast SkimCoat. TectorPlast helps avoid the problems of peeling, weak and unsightly plastering for home interiors and exteriors. The product is ready to use, mixed in perfect proportion so that you can just add water! Available in coarse and fine options, TectorPlast has special additives for easy workability and spreadability – with wide coverage and enduring strength based on the naturally superior quality of Khayah cement.

Features and Benefits

- Easy mixing/good workability: Easiness to hand-mix the mortar.
- Good consistency for application
- Less wastage during application
- Uniform surface because sand is graded
- Higher coverage
- High strength
- Minimum shrinkage cracks

What Tector Does For You

- Unbeatable quality guarantee from the world's largest construction materials business
- Free technical assistance, product use training and support for all Khayah customers
- Peace of mind and the confidence of constructing with the finest blend of materials that money can buy at prices that provide excellent value for money
